PIANO CARE AND MAINTENANCE

1. Piano keys may be cleaned with a damp cloth, wiping immediately with a dry cloth or paper towel. DO NOT USE ALCOHOL, SOLVENTS or other STRONG CHEMICALS to clean the keys.
2. Piano finish may be cleaned with a soft cloth or feather duster always in the direction of the grain. If further cleaning is required a damp cloth may be used followed immediately with a soft dry cloth. Spray cleaner polishes are not recommended because of possible damage to tuning pins, pinblock, strings and action. Exposure to sunlight in any amount can induce color changes and finish deterioration.
3. Piano will last longer and perform better if the interior is cleaned at regular intervals (depending on climate and location). This cleaning should be done only by a Qualified Piano Technician to avoid damage to the precision adjusted action parts.
4. Careful selection and installation of high quality tuning pins, pinblock material and strings ensures a high standard of tuning stability. Due to stretching, settling and changing humidity, your piano MUST be tuned twice a year and routine maintenance be performed for this warranty to remain in effect. It is recommended that a Qualified Tuner-Technician be used for tuning and regulation as well as regular service.
